

## Learn a new skill

A free afternoon of teaching in Penn, Nr. Beaconsfield, Bucks

Saturday 23<sup>rd</sup> July 2022

Starting at 2 p.m. – 3.30p.m approximately

**What is dowsing?** Dowsing is a technique used to uncover information through our own natural intuitive sense. We can pick up energy vibrations which are then magnified through a pendulum or dowsing rods. This ancient skill goes back hundreds of years when it was mostly used for finding water.

By careful questioning dowsing can be used to:

Find water leaks; check your vitamin levels; ask questions about your health; check allergies; find missing objects; heal the energy in your home; choose your best holiday hotel and get help with other lifestyle choices.

Come and learn how to use dowsing rods and pendulums effectively. We will start with teaching you how to obtain a “yes” and “no” answer, using different exercises to strengthen your technique.

Please reserve your place with Susan Scott Powell at [chair@thamesvalleydowsers.org.uk](mailto:chair@thamesvalleydowsers.org.uk)

Or phone for further information on 01494 813 214 (mornings).

Spaces will be limited to 14 people so do book early. We will supply dowsing rods and pendulums for your use on the day. Please bring a garden chair.

Further information will be given on reserving your place. We will not be charging for our time but would appreciate a donation on the day if you have enjoyed the afternoon.

**Thames Valley Dowsers** is a specific interest group affiliated to the British Society of Dowsers and comprises about 60 members. We arrange monthly talks on energy work, healing and dowsing (currently on zoom and many of them with International Speakers) and other field events throughout the year.
