

British Society of Dowzers Training Programme

Understanding Earth Energy Power Centres & Features of Special Geomantic Significance (EE4)

Tutored by BSD Registered Tutor, experienced in dowsing and working with earth energies & sacred space design and construction, in weekend format or minimum 12 hours tuition

Aims

- To introduce regional and large scale geomantic considerations, the nature of earth energy power centres and significant related geomantic features, and their appropriate use
- To introduce the key elements underlying the design of sacred space, including landform, earth energies, geometrical proportion and astronomical alignments.

Objectives: At the end of the course, the students will be able to demonstrate an understanding of:

- The concepts of large scale geomancy, and the significance of earth energy power centres and other powerful geomantic elements
- The influence of cycles of time and geometrical pattern on earth energies and the spirit of place
- The principles of astronomical alignment and geometrical proportion in the design of sacred spaces

Regional Geomancy

- Nature and function of earth energy power centres, marked and unmarked.
- Multicultural use of power centres as sacred sites and points of geomantic influence

Conscious Connection in Power Centres

- Awareness, connection and relationship with Spirits of Place and site guardians

Dowsing

- Dowsing in power centres, underground streams & blind springs, energy leys, global grid crossings, spirals & vortices, geological formations, geometrical shapes & portals
- Impact of solar, lunar and stellar cycles on strength and quality of earth energies and spirit of place

Astronomy

- Alignment with cardinal directions, & drawing down the north
- The movement of the sun and moon along the horizon
- Eight point year

Universal Harmonics & geometrical pattern

- Understanding the relationship between consciousness, number, geometrical pattern and form
- Principles of applied sacred geometry, using the influence of proportion in sacred space design

Creation and use of sacred sites

Introduction to design and construction techniques of broad range of traditional and current sacred and religious structures

Ethics and codes of practice

- Review ethics and psychic hygiene / protection
- Understanding the similarity and relationship between human, animal, plant, earth energy field and other consciousness

Dowsing resources

- Information about the Earth Energies group and further training opportunities and events
